Environmental Policy

1. Purpose

This policy, in accordance with International Organization for Standardization (ISO) 14001, *Environmental Management Systems – Requirements with Guidance for Use*, is the basis for our Environmental Management System (EMS). The EMS is a significant component of the Pantex Integrated Safety Management System and contributes to sustaining the Pantex imperatives of Mission Delivery, Operational Excellence, and Pantex Citizenship. The EMS provides a system to ensure compliance with environmental regulations, and sets controls to accomplish effective waste management, natural and cultural resource management, pollution prevention/source reduction, recycling/reuse, environmental remediation, sustainable acquisition and design principles, energy management/efficiency, fleet management, and water conservation.

2. Scope

This policy governs all Pantex personnel and activities associated with the management of Pantex Plant including subcontractors. The goal of this policy is to ensure work is conducted in a way that protects the environment, prevents pollution, complies with applicable requirements, completes sustainable procurements, and continually conserves and improves the natural environment. This policy shall be made available to Pantex employees through the Business Requirements and Instruction Network (BRAIN), to visitors and contractors via orientation packages, and to the public via external website.

3. Policy

It is the Pantex environmental policy to protect the environment, prevent pollution, comply with applicable requirements, and continually take actions to conserve and improve our natural environment within which we perform our missions. The Pantex EMS:

- Implements appropriate controls and actions to minimize environmental impacts caused by our activities, products, and services;
- Seeks continual improvement in protection of the environment through sustainability, pollution prevention/source reduction, recycling/reuse, and housekeeping excellence;
- Advances strict compliance with relevant environmental laws, regulations, and other requirements;
- Provides the framework for setting and reviewing environmental objectives and targets; and
- Documents conformance to each element of the ISO, *Environmental Management Systems – Requirements with Guidance for Use (ISO 14001)*.
